

TWINSACIDO

ACID DETERGENT

Acid-based detergent for the removal of saltpetre and concrete from surfaces in terracotta, granite and stone

? HOW

- Dilute according to the dirt to remove. We suggest to start with a dilution of 20% in water (standard dirt) to achieve, if necessary, 80% in water (tough dirt)
- Pour the solution on the floor and rub using a fiber brush (never use iron brush), a single-brushing machine or proper disc.
- Rinse well with plenty of water

WHERE

- Terracotta, stone, granite resistant to acids, ceramic, bricks

SUITABLE TO:

- Floors
- Walls

WHY

- Effectively removes saltpetre and residues of concrete

Note: DO NOT use on surfaces sensitive to acids. Test the product on a hidden area before application

COVERAGE:

Approx. 12 mq/kg

PACKAGES

- 1 kg bottle (12 pcs/box)
- 5 kgs tanks (4 pcs/box)

DILUTIONS:

- From 20% of product and 80% of water, until 50%.

HAZARD

Corrosive. Keep far from the reach of children. Do not ingest. Eyes and skin irritating. Do not waste product and container after use. In case of contact well wash under running water. During use wear suitable mask and gloves. Harmful if swallowed
